Attachments: [10.3-4.05.Eco Team Meeting agenda.doc](#)

Thanks for your fast feedback. I just talked with Pam, and she's okay with keeping the October 3-4 meeting in Portland, although she has another meeting in Idaho on Oct 5 that may limit her availability for our meeting. Val is planning to attend our October 3-4 meeting, so hopefully we'll be covered.

Thus, we will keep the October 3-4 meeting here in Portland and I'll send more specifics about the meeting location soon. Rob - thanks for reserving NOAA on Oct 4. I have a couple other possibilities to check out before we make a final decision; if possible, I'd like to have one room for both days.

Attached is a draft agenda for the October 3-4 Eco Team work session. Please take a look and let me know your thoughts. All comments or suggestions are welcome.

Thanks,
Mikell

Subject: Re: Eco Team notes & assignments

Hey Mikell -- thanks for the summary.

Regarding schedule, I'm spending the weekend of Oct. 1-2 on the Oregon coast with my wife and have arranged my logistics accordingly. In fact, my wife has already purchased a ticket to return from Portland to Seattle on Sunday. I hope we can keep the location as we agreed.

Regarding room availability at Fisheries, the 3rd is all booked up but I have reserved a room on the 4th. We could do Monday at DEQ and Tuesday at NMFS to keep the scenery interesting. Let me know if that works.

Oct 4: 10-4 Columbia Room

-R

>Problem Formulation and Workplan Appendices
>
>* We will revisit the PH Workplan Appendices to add/revise management objectives for lamprey, sturgeon and Chinook habitat, and think ahead about how we will use that information. We can pull in useful information from ODFW, lamprey studies, and other sources, and justify changes to the Appendices based on this new information and the team's agreement on how we'll use it.
>
>* Next steps: EI will take a first cut at revising the Workplan Appendices with help from Joe, Jennifer, Ben and ODFW/USFWS to include sufficient problem formulation and proposed management objectives for species habitat in the ISA. Target due date - EI sends revised Appendices to the full Eco Team by September 28 for review and comment. If possible, changes based on comments will be made before the October 3-4 Eco Team work session so that we can move forward with an agreed-to revision.

>Questions about COPCs at the site
>
>* Table E-1 in Appendix B of the 9/9/05 PRE lists 46 COPCs. We need to look at this list, determine what pathways weren't included and identify any changes needed. Also, we need to clarify our process for identifying COPCs and tell the LWG how we want them to do it. Questions/issues that will come up during the process include whether to look across the river as a whole or at localized areas, and the need to look at more than just tissue because PAHs and other contaminants don't bioaccumulate.
>
>* Next steps: Parametrics will look at the COPCs identified by the LWG and develop a proposed process for identifying COPCs and bring it back to the Eco Team for consideration. Target due date - send findings and proposed process to the Eco Team by September 28 for review and comment.

>
>Ecological CSM
>
>* The group agreed to combine the front half of Burt's CSM (sources) with the back half of the LWG's CSM (receptors) with changes to both sides as discussed and agreed upon by the group.
>
>* Next steps: Burt, Rob and Jennifer will work on creating two additional exposure medium boxes on the source side of Burt's model and other changes as discussed to Burt's model. Brent Findley (EI) will combine Burt's CSM with the LWG's CSM and work with Joe, Jennifer, Rob and Chris to ensure accuracy of the revised model. The NRDA "complete/significant" definitions will be added to the revised CSM with changes if needed. Target due date - Brent will send the revised CSM with definitions to the whole Eco Team by September 28 for review and comment. The revised CSM will be printed in wall-size for use at the October 3-4 Eco Team work session. At some point, the team will need to articulate justification for our changes to the LWG's model.

>
>Benthic meetings
>
>* Next steps: Joe will schedule an Eco Team meeting to talk about upcoming benthic tissue sampling and approach, including Jay Field and Mike Anderson (during the week of Sept 26-30). We'll then need a follow-up meeting with the LWG. We should consider delaying the November 1 Benthic Approach deliverable if needed.

>Potential meeting location change
>
>We decided on Monday to hold the October 3-4 meeting in Portland to accommodate Pam's schedule. Her schedule recently changed, and EI has requested that the October 3-4 meeting now be held in Seattle instead of Portland. If we make this change, the October 24-25 meeting would be in Portland instead of Seattle. The October 17 meeting will still be in Centralia or Olympia. Please let me know your thoughts on this location change for our meetings.
